

## PRODUCT DATA

Brand Name: KRICON® 34

**Description:** KRICON<sup>®</sup> 34 is designed for service temperatures up to 3400°F. It is an extra high alumina castable

featuring low porosity and low permeability while maintaining good thermal shock resistance. This mix is

very pure at 99% alumina with a very low content of total impurities.

Physical properties shown are average values of samples taken under controlled conditions ASTM test methods used where applicable

Maximum Service Temperature: 3400°F (1871°C)
