

PRODUCT DATA

Brand Name: R-MAX G QT

Description: R-MAX G QT is a high performance gunning mix designed to provide high abrasion resistance and excellent strengths. R-Max G QT should be installed using conventional gunning methods. After the final set, this unique gun mix can be heated without the traditional controlled heating schedule. Ideal applications for this product include areas of severe abrasion, where refractory heatup is difficult to control or a shorter heatup schedule is desired. ***A water booster pump is recommended for proper installation.***
